

```
USE ROLE ACCOUNTADMIN;  
USE WAREHOUSE COMPUTE_WH;  
USE DATABASE SNOWFLAKE;  
USE SCHEMA ACCOUNT_USAGE;
```

```
/*
```

Snowflake offers two types of feature to check the activity in your snowflake account

1. Latency factor
2. Holds the information for an year
3. Includes dropped objects

```
*/
```

```
SHOW VIEWS;
```

```
/*
```

Query history view is one of the key object to verify the query history for the last year. It can be used for multiple reasons

1. Identify long running queries
2. Identify queries which are spilling storage
3. Identify queries which are failed in last few days

```
*/
```

```
SELECT * FROM QUERY_HISTORY LIMIT 10;
```
