

Complete the following steps to connect to Snowflake:

1. Open a new terminal window.
2. Execute the following command to test your connection:

```
snowsql -a <account_name> -u <login_name>
```

Enter your password when prompted. Enter !quit to quit the connection.

3. Add your connection information to the ~/.snowsql/config file:

```
accountname = <account_name>
```

```
username = <user_name>
```

```
password = <password>
```

4. Execute the following command to connect to Snowflake:

```
snowsql
```

or double click the SnowSQL application icon in the Applications directory.

See the Snowflake documentation <https://docs.snowflake.net/manuals/user-guide/snowsql.html> for more information.

```
snowsql -a <ACCOUNT_IDENTIFIER> -u <USERNAME>
```
